

# HUMANITARIAN ACTIVISM'

© Michael Franz Whitby

Humanitarian activism is the right and left hand of environmental issues  
An enterprising mission for total humans' upliftment unto Planet Earth  
Accomplishments will be measure by karma formats  
Nature to humans - humans to nature  
Because at the end of the day, humans are a part of nature  
They might think otherwise, but humans are just future nature thinkings'...

True-to-life is humanitarian activism  
Flawless transformation, another part of humanitarian activism...  
...with humanitarian activism, a little goes a long way  
One would be amazed of the incredible volume found within small first steps  
But individuals has to go beyond the listening process into action mode  
That's where humanitarian activism gets reinvented  
Letting one being ready for whatever may come ones' way  
Because we all know - recycling works  
Often times to get the bet results just takes persistence in practice  
The message from listeners are hearing

Submissions by all are welcomed...  
By letting us do right by our next generation...  
...generation'nexts shall visualized and look to the future  
Since in most storms - humanitarian activism becomes that beautiful colour  
Preparation for that whiter shade of pale  
Storm allows for ultimate opportunity for system  
Between human and nature rejuvenation  
The attainment of the oneness  
For the hard to hear - hearing without the need of an audiologist  
That the real boost hidden within humanitarian activism  
Taking to the forum towards betterment  
Without stepping one foot outside the ram of the human consciousness  
The naked truth lies with the difference scenes of humanitarian activism  
So clear winners are still not yet declared on a global scale

Story of abundance which every human know:  
*'Humanitarian activism will some day make it crystal clear  
It's designed to move all'*
